

# GRCC

## Information Security

### **Purpose**

Encrypting iOS devices for increased mobile device security.

### **Process**

1. Open Settings

2. Select Touch ID & Passcode
3. Scroll to the bottom and check for “Data protection is enabled.”

Make sure to set a passcode on your device, a fingerprint on your compatible iOS device, or use Face ID on newer devices. This may all be setup via Touch ID & Passcode within Settings.
