Explore careers in manufacturing and construction and make something awesome at Grand Rapids Community College this summer!

WHAT WILL YOU MAKE?
Our summer camps are designed for 6th to 8th graders and promote safety, learning, and taking a project from start to completion all while teaching relevant, in-demand, career focused skills.
Fun is guaranteed during a week of building great woodworking projects or exploring the high tech world of manufacturing! Experience is not a prerequisite; only a willingness to learn and have fun! Both camps are hands-on and focus on creating cool projects for you to take home!

HEY MOM AND DAD!
Our camp allows the opportunity for your child to:

• Become self-reliant
• Learn the value of persistence
• Help cultivate strengths and interests
• Learn the importance of safety
• Understand the principles of math and science
• Launch a hands-on career
• Find satisfaction and pride in taking a project from start to finish
