

APG Performance

As we reach the mid-point of the America's Promise Healthcare Pathways project, we have now exceeded 800 individuals served, a milestone we are excited to celebrate! Partners across the region are contributing to this figure. These 800 participants are individuals who are receiving the assistance, coaching, training, and support they need at any of a dozen organizations across West Michigan. When we look at the numbers, and hear the stories, we are beginning to see and feel the true impact resulting from two years of hard work.

While we are excited, we know there is a tremendous amount of work to be done to expand this system. We are connecting partner organizations, employers, and training providers to develop innovative educational programs. We are constantly analyzing data to monitor and predict employment trends. We are improving funding strategies to increase the availability and accessibility of healthcare training programs. We are engaging with new organizations across the region to spread the reach of this system. We do all of this to better support communities of underserved individuals to help them enter or advance their healthcare career pathway.
