The Tassell M-TEC is home to:

- 90,000 square feet of space devoted to workforce training.
- A world-class 23-day Automotive Service training facility.
- A world-class Metal Forming and Welding training facility.

Tassell M-TEC Divisions:
- Job Training
- Workforce Training
- Customized Training
- Continuing Education

Job Training
GRCC Job Training offers eight career pathways. This hands-on training operates as much like private industry and business as possible. We enroll participants every other month in our 20-week programs, which means that you don’t have to wait until next semester to begin working toward a better future.

Programs include:
- Automotive Technician
- Computer Support Technician
- Construction Electrical
- Introduction to Construction
- Machinist / CNC Technician
- Medical Assistant (6 month program)
- Residential Construction
- Welding / Fabrication Technician

Companies served through the Tassell M-TEC last year: 424 through Workforce Training, Job Training, Apprenticeship, Customized Training, and Continuing Education and Professional Development.

There were 202 students in 2017-18 in Job Training programs, up 35.6 percent from the previous year.

Workforce Training
GRCC Workforce Training is your first responder in skills development in West Michigan. This is where we research and test our new training. We launched more than 10 pilot training programs, including the Public Works Academy, Sterile Processing Technician training, Drone Licensure, and Industrial Sewing during the last year alone.

Continuing Education and Professional Development
Continuing Education and Professional Development is your company’s training department. From the early days of AutoCAD to today’s mechatronics and advanced manufacturing, businesses throughout Michigan have used CEPD opportunities to ensure that their employees remain relevant. CEPD is an exceptional educational resource for both area employers and their employees. Last year we offered workshops on more than 50 topics.

Customized Training
Customized Training has a long history of supplying companies of all sizes with the technical skills training they need to compete in a global market. We provide training and consulting services in business, health care, leadership, lean/continuous improvement, metals, plastics, quality and more. In addition to designing curriculum that achieves measurable outcomes, we deliver training that fits your schedule to meet the demands of your workforce.

Last year 2,696 people received customized training from 61 companies which allowed them to reduce waste, increase productivity, and boost your employees’ skills.

Apprenticeships
There were 354 Electrical Apprenticeships, up 8.9 percent from the previous year.

Economic Impact
GRCC’s noncredit workforce programs generate millions of dollars for the West Michigan economy.*

- During fiscal year 2016-17, past and present students of GRCC’s noncredit programs generated $129,700,000 in added income for the region.
- Since 2010, the M-TEC has assisted and secured $37,515,000 in grant dollars for various West Michigan projects.**
- The Tassell M-TEC has brought in $4,500,177 in grant funding for education and training programs already in the 2018-19 fiscal year.**
